Peshawar, Pakistan | +92 313 4576868 | moaazali@m4soraofficial.app | moaazalisiddiqui710@gmail.com
Portfolio: moaazdev.me | Company: m4soraofficial.app | linkedin.com/in/moaazalisiddiqui | Instagram: @ai_moaazali

PROFESSIONAL SUMMARY

Full Stack AI Developer and co-founder of M4Sora with 4+ years of professional video editing and 1+ year building agentic AI systems and client websites. Designs autonomous AI agents and workflow automations with n8n, Google Gemini API and OpenRouter, and ships full-stack web apps on Supabase, Netlify and WordPress. Serves as General Manager for technology operations at NETMIND LLC. Confident presenter who explains technical products to judges and mixed audiences, recognised at hackathons and tech meetups in Peshawar while still a Matric student.

CORE SKILLS

- AI & Automation:** Agentic AI, AI Agents, Workflow Automation, n8n, LLM Integration, Google Gemini API, OpenRouter, Prompt Engineering, Chatbot Development
- Web Development:** Full Stack Development, React, Next.js, TypeScript, HTML, CSS, JavaScript, Tailwind CSS, GSAP Animations, Supabase, WordPress, Netlify, Hostinger
- Developer Tools:** Claude Code, OpenAI Codex, Google Antigravity, Git, Docker and Kubernetes (fundamentals)
- Creative Media:** Video Editing, Motion Graphics, Adobe After Effects, Adobe Premiere Pro, CapCut, Graphic Design, Brand Design
- Business & Leadership:** IT Operations, IT Consulting, Technical Advising, Financial Planning, Client Relations, Team Hiring, Project Management
- Communication:** Public Speaking, Technical Presentations, Product Demos, Content Creation, Team Collaboration

PROFESSIONAL EXPERIENCE

- Co-Founder & Full Stack AI Developer | M4Sora**

Pakistan | Mar 2026 – Present

 - Lead technical development of custom AI automations and web applications for global clients; 11 delivered systems are listed in the company portfolio.
 - Built the Omni-SaaS Platform, automating end-to-end faceless video creation by connecting AI script writing, voice generation and image generation pipelines.
 - Developed autonomous AI agents, including an AI Receptionist voice agent for 24/7 call handling and appointment booking and an AI Recruiter for voice-based candidate screening, plus chatbots and workflows built with n8n, OpenRouter and the Google Gemini API.
 - Set up secure Supabase backend databases and deployed web applications on Netlify, Hostinger and WordPress.
- General Manager | NETMIND LLC**

Remote | Jan 2026 – Present

 - Oversee technical operations and digital presence, linking business objectives to technology execution.
 - Serve as primary technical advisor to the owner, managing software infrastructure and resolving technical bottlenecks in daily operations.
 - Manage deployment, maintenance and optimization of company websites and web properties.
 - Support technical recruitment, including promoting open roles for senior full-stack engineers.
- Senior Video Editor (Freelance) | Fiverr**

Hybrid | Feb 2023 – May 2026

 - Delivered high-retention video edits for content creators and businesses, helping client channels grow to millions of views.
 - Produced cinematic, story-driven edits and motion graphics in Adobe After Effects, Premiere Pro and CapCut.
- Video Editor | ACCA with Moez**

Remote | Jan 2024 – Feb 2026

 - Edited educational video content and created supporting graphic design assets for an ACCA learning brand.
- Chief Financial Officer | Capable Homes**

Peshawar, Pakistan | Oct 2025 – Mar 2026

 - Oversaw financial operations, strategic financial planning and fiscal management for a social-impact startup.
 - Supported the company's mission of building home automation devices for Persons With Disabilities (PWDs) to promote independence, accessibility and equality.
- Owner & Lead Designer | M4S Designs**

Peshawar, Pakistan | Sep 2025 – Mar 2026

 - Ran a design studio delivering custom graphic design, video and branding solutions.

- Managed creative direction, client relations and quality control across all projects.

CASE STUDIES

Client Retention & Churn Risk Engine

React, TypeScript, Tailwind CSS

- **Challenge:** Commercial cleaning companies often learn a client is leaving only when a non-renewal notice arrives, because complaints, missed shifts and inspections sit in separate tools.
- **Solution:** Built a retention dashboard that scores every account from six operational signals with a transparent, rule-based model, and explains each score point by point.
- **Features:** CRM connection wizard with field mapping for 8 CRMs (HubSpot, Salesforce, Zoho and others), CSV import with formula-injection protection, an intervention pipeline and an outreach script generator.
- **Outcome:** Gives managers one view of revenue at risk, which accounts are at risk, why, and what to do in the next 48 hours.

Invoice & Document System

React, Puppeteer, Node.js

- **Challenge:** A company group needed consistent, professional invoices and official letters without manual formatting in Word.
- **Solution:** Built a billing and document app that generates vector PDF invoices through a headless Chromium engine, with client ledgers and a built-in PDF editor.
- **Outcome:** Invoices and authorization letters, in both print and digital modes, are produced from one place in a consistent format.

Tufted – Custom Rug Brand Website (Pakistan)

Next.js, GSAP, Lenis, SEO

- **Challenge:** A handmade tufted rug studio needed a website that shows its craft and takes custom orders, not a generic online store.
- **Solution:** Designed and built a multi-page site with a portfolio of work, individual project pages, a process page, a journal, an FAQ and a custom rug request form.
- **Details:** Bold editorial typography, smooth scrolling, Schema.org local business data for search and Instagram integration.

Skyler Espinoza – Tattoo Artist Portfolio (Colorado, USA)

React, Vite, GSAP, HTML Canvas

- **Challenge:** A black and grey, Chicano-style tattoo artist wanted clients to picture a design on their body before booking.
- **Solution:** Built a portfolio site with a gallery, case studies and an inquiry form, plus a "Try It On" tool.
- **Feature:** Visitors upload or draw a design and place it on a photo of their skin, adjusting scale, rotation and opacity in the browser.

M4StorIQ – AI-Powered PC Optimization App

LLM integration, Windows | Jun 2026

- **Challenge:** Most PC cleanup tools are paid, and users rarely know what is filling their storage.
- **Solution:** Built and launched a free Windows utility with AI suggestions for storage cleanup, drive analysis, large-file detection, process and app management, and live system monitoring.
- **Outcome:** Released publicly and free for everyone; started as a 10th-grade project and grew into a full product.

AWARDS, PUBLIC SPEAKING & COMMUNITY

- **Winner, From Vibe to Live Peshawar Meetup (Clerk × Devin × Supabase), Sep 2026:** Built and presented a project live, placing among the winners in a field of university students as the only Matric-level builder.
- **Certificate of Appreciation, CNCF Peshawar Genesis (Cloud Native Computing Foundation), Sep 2026:** Recognised for contribution and support to the community and its open-source ecosystem.
- **Top scorer (19/20, 95%), FutureVerse 2026 Talent Hunt Robotics Workshop, Peshawar, Sep 2026.**
- **Devathon participant, TechVerse 2026 (TMUC × Toopistan), Aug 2026:** Presented a 3D certificate portal to judges and received positive feedback on design and delivery.
- **Public speaking:** Regularly presents products and technical ideas at meetups and competitions; creates educational content on AI-assisted development for a LinkedIn audience of nearly 1,000 followers.
